

# Rural Livability in Northern Wisconsin

---

MAY 7, 2024

Extension  
UNIVERSITY OF WISCONSIN-MADISON

# The Rural Livability Project

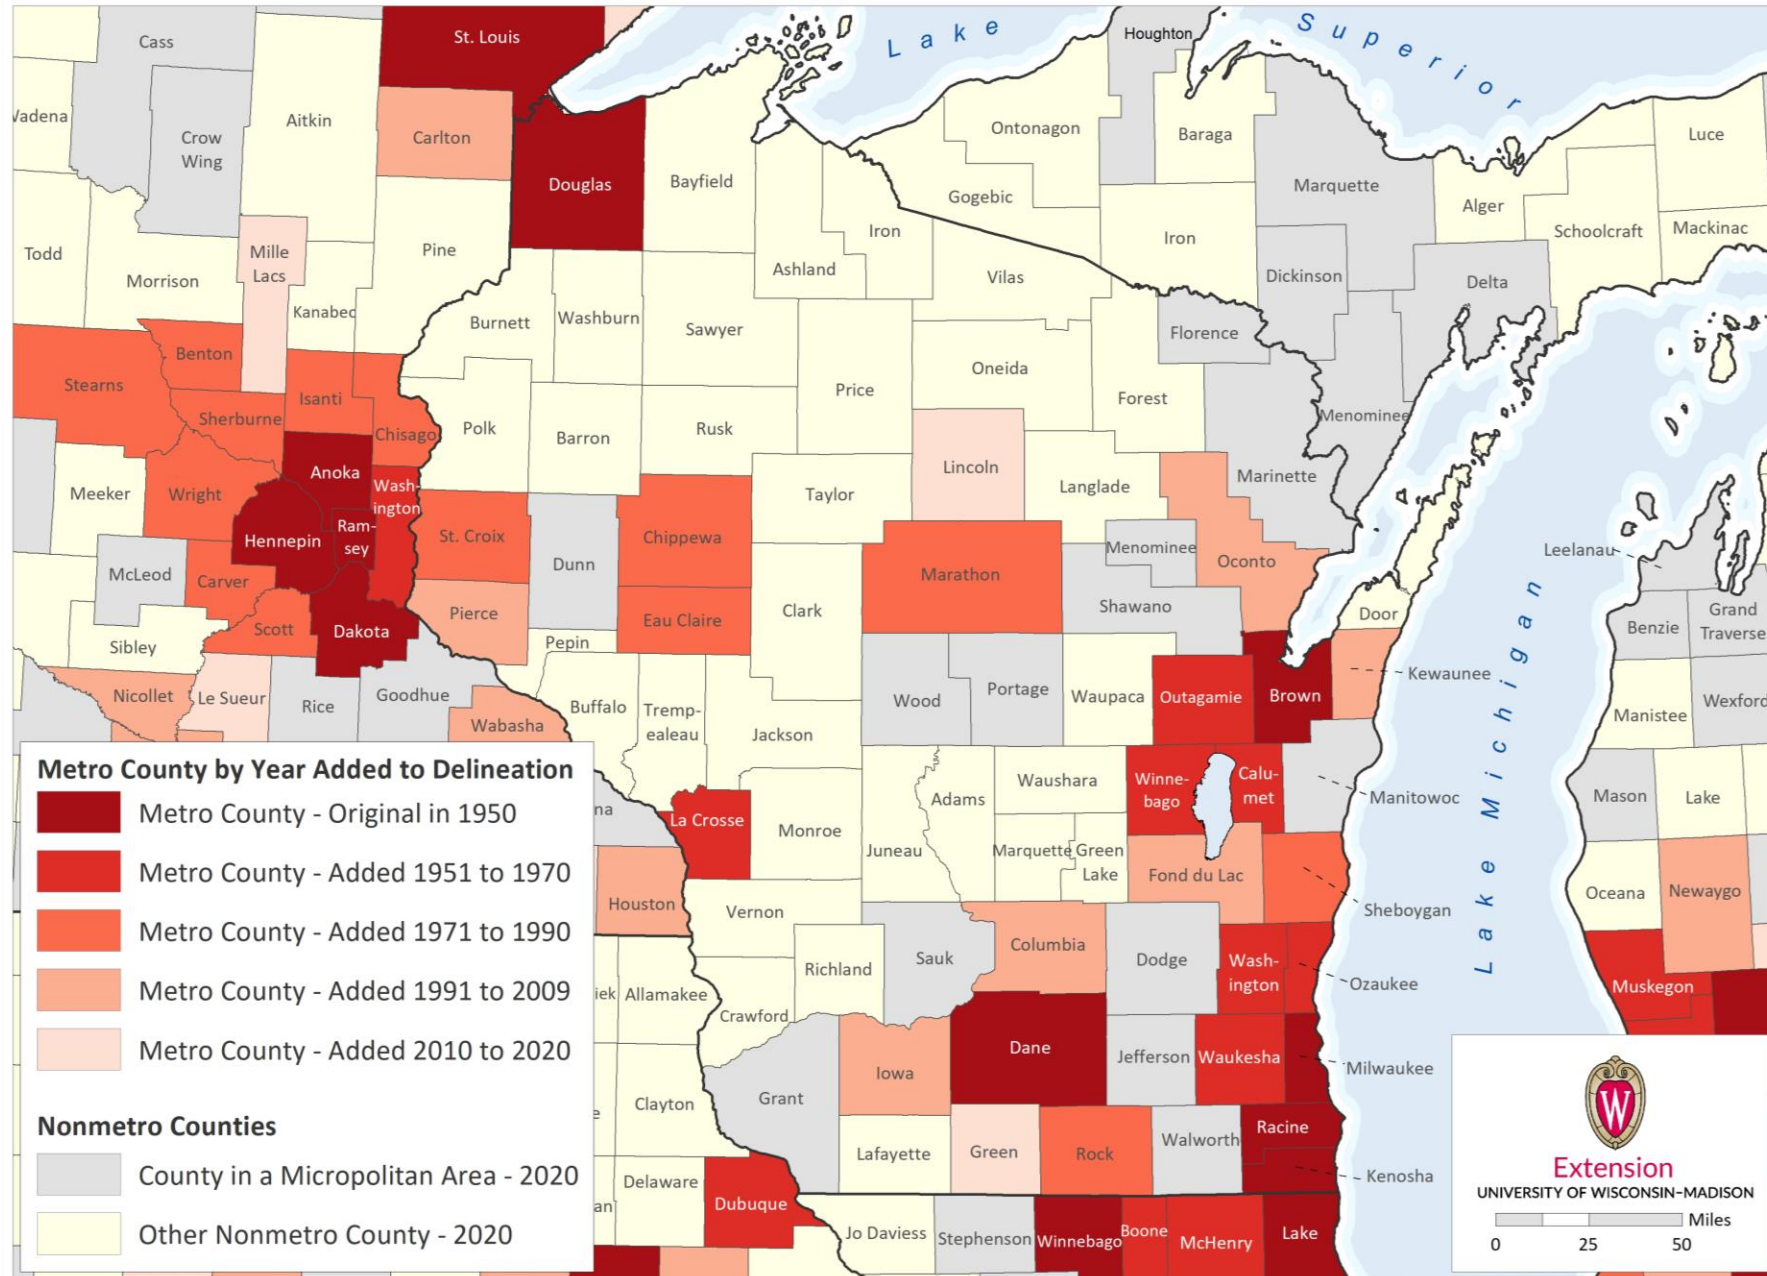

Part of a USDA-funded Institute for Rural Partnerships housed at UW–Madison, Auburn University and the University of Vermont.

## **Motivation - A better understanding of the factors contributing to rural challenges and rural success:**

- Loss of critical institutions, industrial restructuring, out-migration/population loss, high mortality rates, lack of housing, declining civic engagement/social capital, etc.;
- But not everywhere! – How can we learn from places that are doing well (or were doing well and transitioned into decline)?
- How can we better understand path dependency? Regional interactions? Outliers?
- Can we create blueprints for supporting community and regional livability?

# Change in Metropolitan Counties - 1950 to 2020

# Defining and Identifying Livable Communities

## *How do you define “livable”?*

Often the emphasis is measuring the growth of economic variables:

- Population
- Jobs/Employment
- Income/Wages
- GDP

Many Northern Wisconsin communities are thriving and doing well...but by traditional economic growth metrics they appear to be stagnant. *Is the focus on growth of traditional metrics too narrow?*

# Percent Change in Total Employment - 2006 to 2019

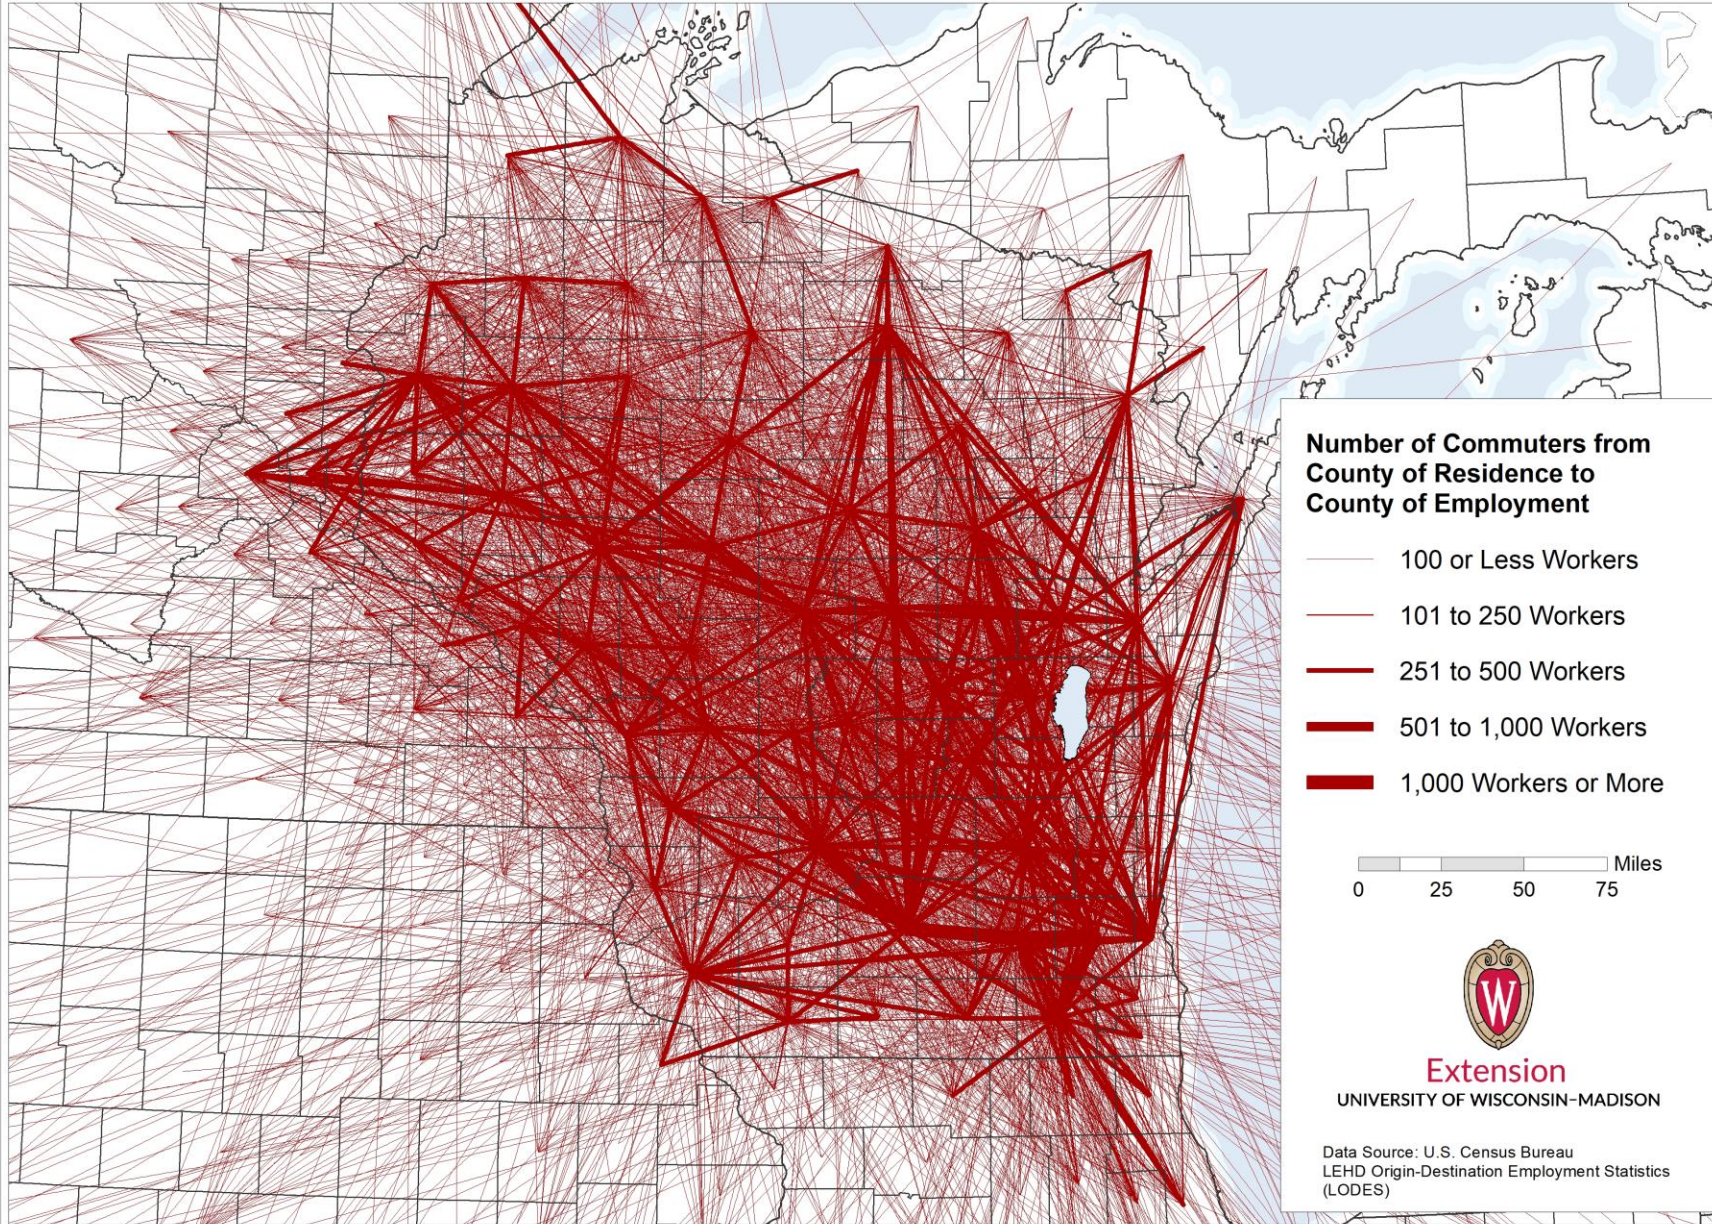

# Percent Change in Total Employment - Q3 2019 to Q3 2023

# Commuting Networks for Wisconsin Non-Metro Counties - Outflow from County of Residence

# Northern Wisconsin Business Annual Business Applications – 2005 to 2022

# Percent Change in Business Applications - 2020 to 2022

# Annual Average Unemployment Rate (2023)

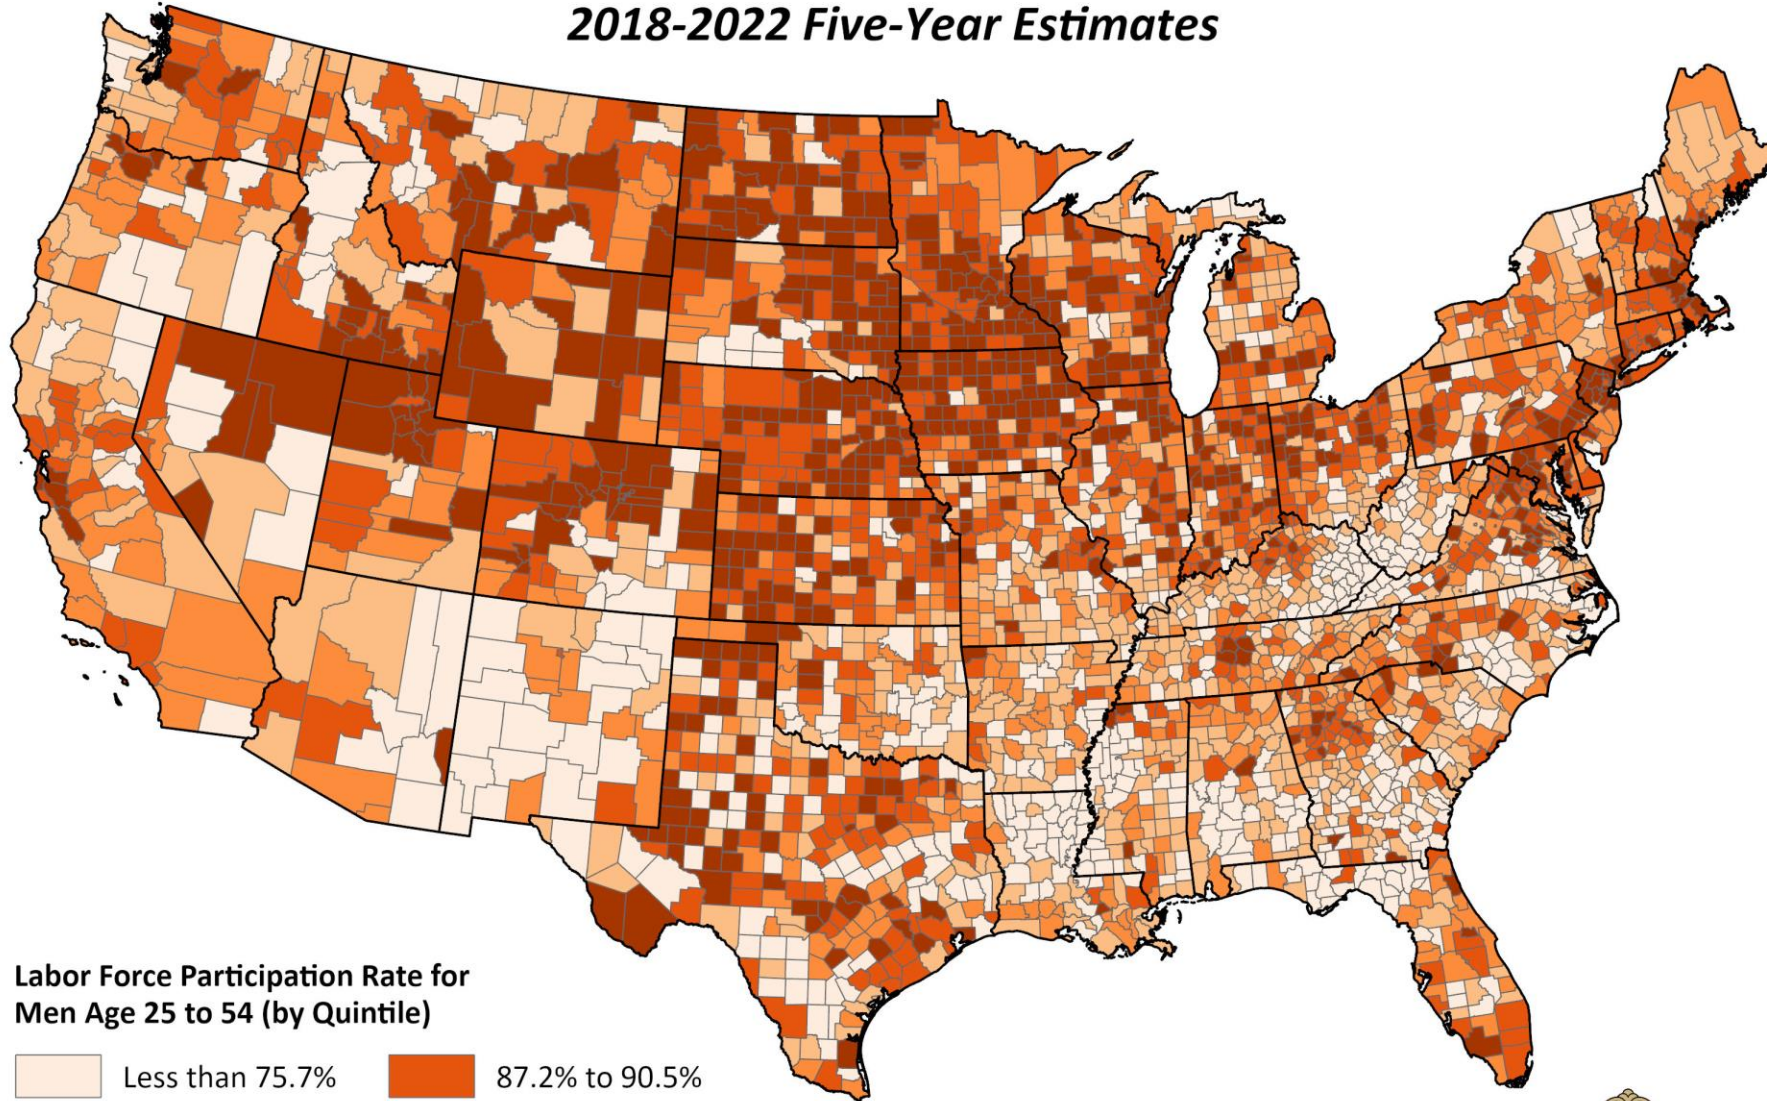

# State of Wisconsin Unemployed Individuals per Job Opening *January 2001 to February 2024\* (Seasonally Adjusted)*

Data Source: Bureau of Labor Statistics \*February 2024 values are preliminary

# Labor Force Participation Rate for Men Ages 25 to 54

## 2018-2022 Five-Year Estimates

Labor Force Participation Rate for Men Age 25 to 54 (by Quintile)

# Do Jobs Follow People or do People Follow Jobs?

# What if we Shift the Focus to Quality of Life?

- What defines quality of life?
- Different people value different community attributes;
- **Community Capitals Framework** provides one model.

# What can People's Behavior tell us about Community Livability?

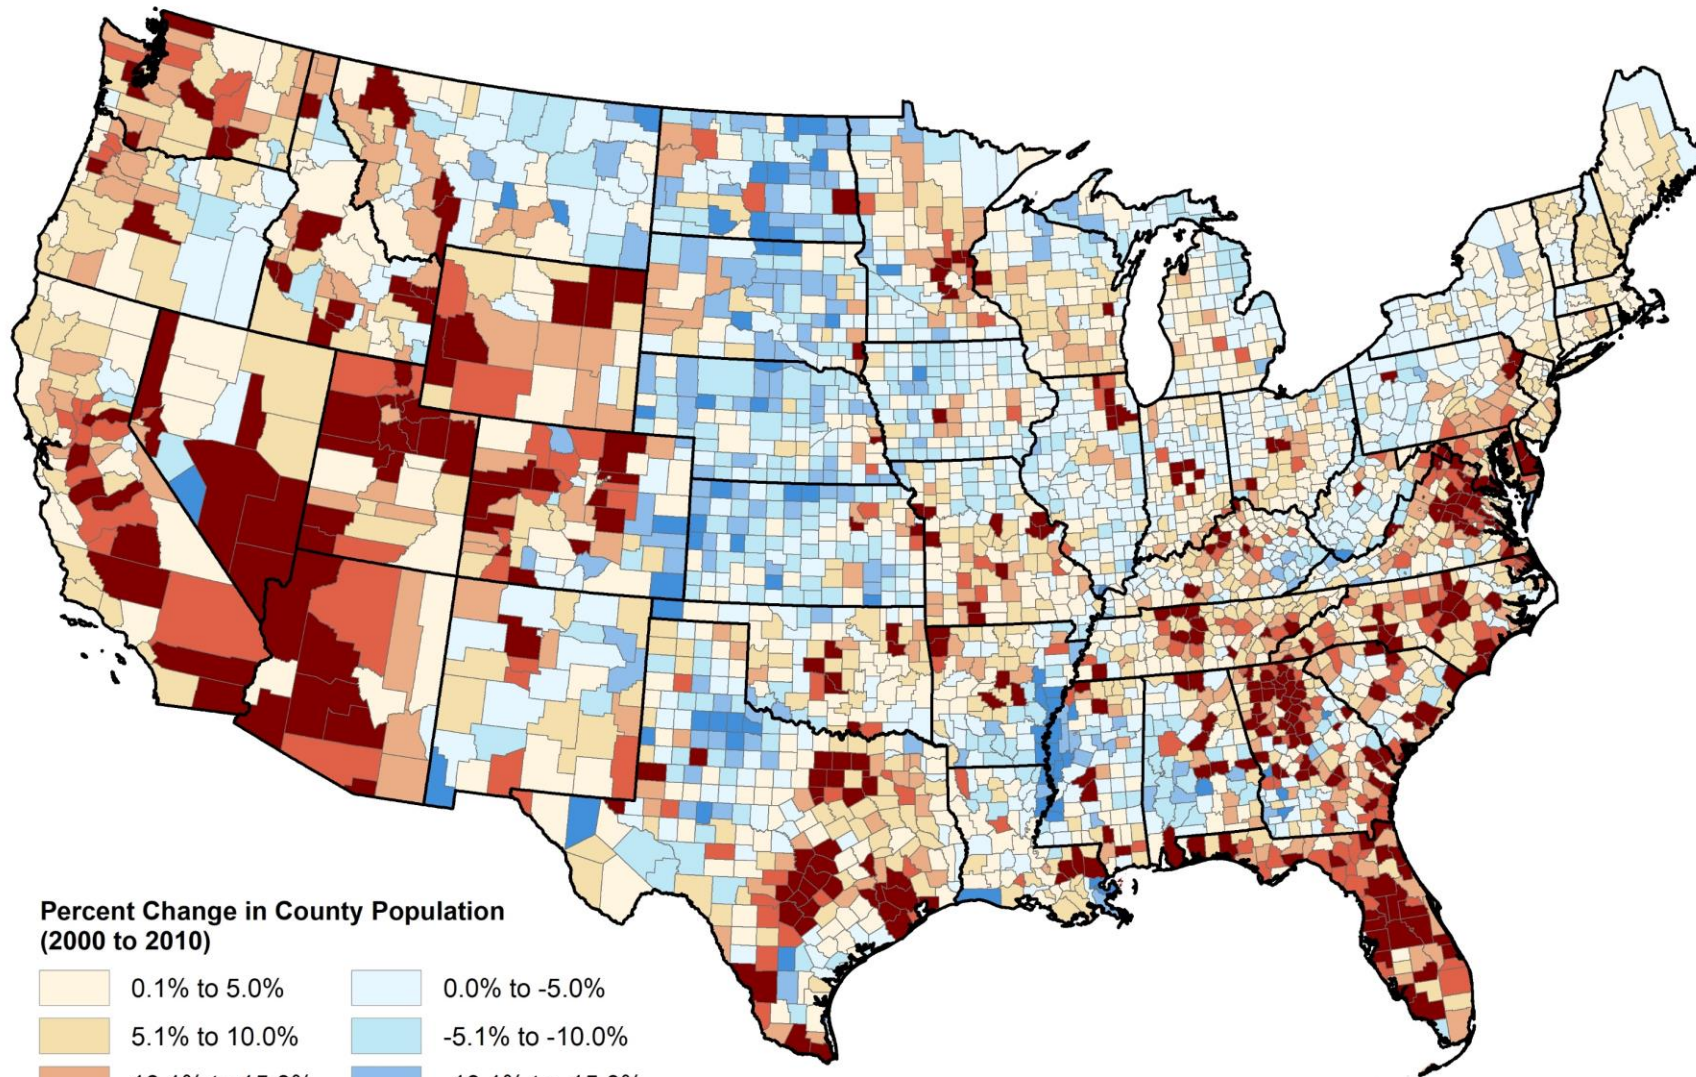

---

- **High in-migration:** A signal that people want to live there?
- **Low out-migration:** An indicator that people who live there want to stay?
- **A stable or high birth rate:** An indicator that people want to have families in a community or demographics are favorable to a high birth rate?
- **Home value appreciation:** An indicator of the value of living in a place or a barrier to people who want to live there?
- **New business start-ups:** An indicator that people view a community as a good place to own a business?

# Percent Change in Population by County - 2000 to 2010

**Percent Change in County Population  
(2000 to 2010)**

0.1% to 5.0%	0.0% to -5.0%
5.1% to 10.0%	-5.1% to -10.0%
10.1% to 15.0%	-10.1% to -15.0%
15.1% to 20.0%	-15.1% to -46.6%
20.1% to 110.4%

# Critical Institutions - The Ability to Meet Needs on a Routine Basis

- Healthcare
- Education
- Pharmacies
- Grocery stores
- Veterinary Clinics
- Childcare
- Broadband
- Banks
- Etc.

Number of Children Under Age 5 per Childcare Establishment (by Quintile)

	12.2 to 20.4 (1st Quintile)		30.9 to 43.0 (4th Quintile)
	20.5 to 24.8 (2nd Quintile)		43.1 to 50.6 (5th Quintile)
	24.9 to 30.8 (3rd Quintile)		Data Suppressed

# Creating Typologies and Potential Blueprints

- Focus specifically on livability;
- Different ways of thriving;
- Then identify a “blueprint” for each type.

Type 1: High natural amenity, older demographic, high-income, large tourism industry

Type 2: Near a metro area, strong presence of critical institutions, accessible housing

Type 3: Young demographic (families), strong presence of critical institutions, employment diversity

**And so on...**
